

First Aid Training

The ability to provide an appropriate First Aid and emergency response is paramount to ensuring the safety of others and to maintaining a duty of care for the people in our lives.

These units provide a broad understanding of First Aid and give you the practical tools to effectively respond in an emergency situation within the workplace, at home or in the community. The training includes topics such as how to respond to asthmatic and anaphylactic emergencies and how to administer Cardiopulmonary Resuscitation (CPR).

HLTAID011 - Provide First Aid

For individuals who are required to administer First Aid and respond to emergency situations within a range of workplace and community settings. Training includes the practical skills and knowledge required to manage First Aid tasks and contingencies in the context of the job role and environment.

HLTAID012 - Provide an emergency First Aid response in an education and care setting

For educators and support staff working who are required to administer First Aid and respond to emergency situations within an education and care setting. Training includes the practical skills and knowledge required to provide First Aid to infants, children and adults.

HLTAID009 - Provide cardiopulmonary resuscitation

This unit allows you to refresh and maintain your knowledge of the essential skills required to perform CPR, in line with the [Australian and New Zealand Committee on Resuscitation \(ANZCOR\) guidelines](#).

The training equips you to manage a life threatening incident and could ultimately save a life.

Recertification

HLTAID011 and HLTAID012 In NSW, Workcover's [First Aid in the Workplace Code of Practice](#) recommends re-certification every 3 years.

HLTAID009 - The Code also requires First Aiders to complete a refresher of the CPR component on an annual basis.

We can also track and notify you when a recertification is required for you or your team.
